

North Maharashtra University, Jalgaon
Faculty of Science and Technology
BACHELOR OF COMPUTER APPLICATIONS (BCA)
BCA 607 - Project Report & Viva
w.e.f. 2019-20
Total Lectures: 60
[Total Marks: 60 External + 40 Internal =100 Marks]

Objective: – To prepare students to use applications of the theory and practical learned during the course.

PROJECT WORK

1. Each student shall have to carry out the project work based on System Development which may include Application Program, Database Management System, Web Based Application, Smart phone Application, System Tools, Network System Application, etc. A project may be carried out at any outside organization or on a sub system of an organization.
2. The project work should be carried out individually. No group work is allowed in the Project work. The project title should not be repeated.
3. The topic of the project should be decided with the consultation & guidance of an internal guide-teacher of the institute/college. The project should be necessarily innovative and problem solving. No teacher shall be entrusted with more than 15 students for guidance and supervision.
4. The student should clearly mention the need of project , database(s), files required for the project, DFD , Normalization, ERD, software used for the project, reasons for selection of that software, inputs required, outputs produced etc.
5. The application should be menu driven and should provide the facilities of storage of data, modifications in existing data, deletion of unwanted data, and viewing of data.
6. The student has to write a report based on the actual work undertaken during the vacations at the specific selected enterprise/ organization or sub system and get it certified by the concerned teacher that the Project report has been satisfactorily completed and submit TWO typed copies of the same to the Head / Director of the institute /Principal of the college.
7. One copy of the report submitted by the student shall be forwarded to the University by the Institute.
8. No student will be permitted to appear for Viva-Voce examinations, unless and until the project report is submitted within the stipulated time.

Conclusion

The conclusion regarding a voting management system depends on various factors such as its effectiveness, security, accessibility, and transparency. Here's a potential conclusion based on these considerations:

In conclusion, the implementation of a well-designed voting management system holds the potential to significantly enhance the democratic process. By leveraging technology, we can streamline the voting process, increase accessibility for all citizens, and ensure the integrity and security of the electoral system. However, it is crucial to prioritize security measures to safeguard against potential threats such as hacking or tampering. Transparency in the system's operations is paramount to instill trust among voters and stakeholders. Furthermore, ongoing evaluation and updates are necessary to address evolving challenges and maintain the system's effectiveness. Overall, with careful planning and continuous improvement, a voting management system can serve as a cornerstone of a robust and inclusive democratic society.
